Moment one
The moment when God ran out of names for trees and hesitated
And called them all 'things'

Moment two
The moment when the execution of the king was decided on the flip of a coin
And the coin rolled down a grate

Moment Three
The moment when the Isle of Wight began to float away from Africa

Moment Four
The moment when the wheel was invented and then it broke instantly
And how long we had to wait for that wheel

Moment Five
The moment when Jim on the morning of the pit disaster decided not to go
Because he had a strange feeling at the back of his neck
And as he decided
The chimney of his house blew off and flattened him

Moment Six
The moment we all thought we'd forgotten
And then the light reminded us

Moment Seven
The moment just before Neil Armstrong stepped
Onto the moon

And the Welsh who'd been there for years
Scuttled back to their underground palaces

Moment Eight
There is no moment eight
It's forgotten

Moment Nine
The moment when the Titanic missed the iceberg
You can make these moments up you know
They don't have to be real

Moment Ten
The moment that occurs just before huge moments of history
You know the one
The moment that occurs just before a
Huge moment of history
